

IRC System List

System Status Name

Operational

Short System Name:

Long System Name:

Description:

@Risk	@Risk	Advanced risk analysis for spreadsheets
Accuspec software	Accuspec software	Multichannel Analyzer data acquisition and analysis
ACQ Closeout	ACQ Closeout System	The ACQ Closeout application is a tracking system for closeout information; entering Closeout clearance requests and receipts of clearance; and generating standard reports based on this information.
Action Tracking Systems	Action Tracking Systems	Slightly varying versions of the Action Tracking System are currently in use in several divisions throughout CH. The system's main function is to aid secretarial staff in tracking action items with suspense dates. Lead secretary in each owner organization is the system's main user. Supervisors and directors may also have access.
AllNames	AllNames/Individual Salary System	The Allnames application is an employee tracking system. Tracks personnel and network information. Assists HR in tracking personnel data at CH and the off site offices.
Annual Property	Annual Property Valuation System	The annual property valuation system provides replacement values costs used for insurance purposes for all government property under contractor control

ARS	DOE-CH Automated Reservation System	The Automated Reservation System (ARS) was created to allow for the capability of viewing and making reservations for Building 201 conference rooms and equipment (i.e. flipcharts, TVs, VCRs) by all DOE-CH employees at the Argonne and Fermi sites.
ASAP		The Automated Standard Application for Payments (ASAP) is a system through which organizations receiving Federal dollars can draw funds pre-authorized by Federal Agencies for payment through the US Treasury. ASAP is an all-electronic payment and information system developed jointly by the Financial Management Service (FMS) of the US Treasury and the Federal Reserve Bank of Richmond.
Blinds Quality Control	Blinds Quality Control	
CFIS	Chicago Financial Information System	The primary function of CFIS is to manage and communicate the travel, training, and awards performance results by B&R by office. Allocations are manually entered by Budget and the obligations are derived from DISCAS or other sources. CFIS is set up on the intranet and accessible by all area offices and internal groups so that each can monitor the obligations of the travel, training, and awards funding allocated to their office. The small purchase area is the only other discretionary funding not included in CFIS.

CH Reading Room	CH Reading Room	The CH Reading Room is a public document inventory system that keeps track of documents that are sent from various government branches. The Public Document Reading Room is located at the University of Illinois in Chicago
CHRIS	Corporate Human Resource Information System	Corporate Human Resource Information System. DOEINFO is a subsystem of CHRIS.
Cost	Cost Database System	The Cost Database was designed to document the receipt of all annual property reports from DOE contractors and/or grantees
Customer Address	Customer Address System	The system's main function is tracking surveyed customer addresses for the Corporate CH groups and to create downloadable files for mail merges. The surveys are sent to customers through email or regular mail. The customer may be internal, external or public
Decon	Decon	Works like ISDMAP, used for improving on present ISDMAP technique.
Deposits	Deposits	The Deposits application tracks customer's checks for receivables and reimbursements.
DISCAS	Departmental Integrated Standardized Core Accounting System	Departmental Integrated Standardized Core Accounting System.
DocLog System	Document Logging System	The DocLog System tracks the Manager's mail as it is received and distributed to appropriate organization for action or information.

EEO Clearance Tracking	EEO Clearance Tracking System	The EEO CLEARANCE TRACKING SYSTEM was designed for the purpose of tracking clearances with DOE contractors and universities. This system is used by the Acquisition Support division.
EML Firewall	EML Firewall	Firewall protecting the EML LAN from the Internet.
EML Internet Servers	EML Internet Servers	Public Web and FTP servers. Host the EML public website and the Intranet site. Used for data collection for Human Subjects and QAP. Provides the Sample Archive Database, Human Subjects Research Database, QAP reports, EML publications, the EML Procedures manual, and information about EML to the public.
EML LAN	EML Netware network	EML local network, providing file and print services.
EPG Labeling System	EPG Labeling System	The EPG Labeling System prints labels that are placed on all correspondence. The data contained on each label aids EPG's document management clerk in managing and tracking all incoming and outgoing correspondence. This system is used by EPG & ARG for facilitating document tracking through PCDOCS.
ERDMS	Exposure Records Data Management System	The Exposure Records Data Management System (ERDMS) records radiation exposure histories for individuals and meets reporting requirements in accordance with Title 10 CFR Part 835. Two versions exist for STS and NBL.

ES&H Management Plan	ESH Management Plan	The ES&H Management Plan Information System (MPIS) is a PC-based database system that captures information concerning the scope, schedule, priorities, and cost of each facility's ES&H activities to allow consistent DOE-wide collection, consolidation, and reporting of information. It accepts and stores data associated with the ES&H Activity Data Sheets (ADSs) for each DOE facility or operation. ADSs are developed for both funded and unfunded ES&H activities. The System accepts risk priorities assigned to each ADS for the ES&H Risk-based Priority Model (RPM) and can be used to generate a prioritized listing of ADSs. Activity priorities generated from other risk models can also be input into the system.
ETA	ETA-Timekeeper-Energy Time & Attendance	Energy Time & Attendance is a data entry application used for entering employee hours and submitting this information to DOE-HQ for payroll processing.
FOIA	Freedom of Information Act/Privacy Act Request System (FOIA/PAR)	The Freedom of Information Act/Privacy Act Request system tracks requests for federal agency records submitted by the public to CH under the Freedom of Information Act and Privacy Act Request.
Genie2000	Genie2000	Analysis of alpha spectra using an interactive peak-fitting routine.

Grants Database	Grants Database	The purpose of the system is to manage grants. This is a multi user system and is primarily used by ACQ data entry specialists. This application was written for two groups. GrantsABC has 17 users and GrantsD has 7 users. This application is written by PAI Corporation and adapted by DOE-CH.
Graphics	Graphics applications	Software used for graphics presentations, slides, posters.
HSRD	Human Subjects Research Database	Annually, labs and other institutions conducting human subject research using DOE funds, DOE facilities, or DOE personnel are required to submit data on their projects to a centralized database at EML.
ICP/AES	ICP/AES	
ICP/MS	ICP/MS	
Internal/External Vacancy	Internal/External Vacancy Mailing System	The system keeps track of mailing internal and external address and prints out mailing labels.
ISDMAP	ISDMAP	Deconvolutes in-situ gamma spectroscopy data.
Java, javac, et cetera	Java, javac, et cetera	Compiles java text files into java virtual machine code, runs this code, performs other simple operations on this code.
Jext	Jext	Edits java files
Labels Unlimited	Labels Unlimited	dBase label program for QAP
LAHET Code System	LAHET Code System	Monte Carlo radiation transport (high energies)

LFR	Local Facility Register System	The Local Facility Register system's main function is to track security interests at DOE locations where CH is the Lead Responsible Office and/or the surveying office. Creates an unclassified searchable database of all locations that CH has a security interest in as the Lead Responsible Office and/or surveying office.
LIMS	LIMS	
MCNP	MCNP	Monte Carlo radiation transport (medium and low energies)
MCNPX	MCNPX	Monte Carlo radiation transport (all energies)
Microsoft Project	Microsoft Project	Project tracking, Gantt charts, etc.
Minitab	Minitab	Statistical analysis package.
MSL	Manager's Signature Log	The Manager's Signature Log system main function is to track pertinent information for all correspondence signed by the Manager.
NBL CheckWeight Calib	NBL CheckWeight Calibration System	
NBL Chemical Inventory	NBL Chemical Inventory (paths to andy\keepers; andy\wkeepers)	
NBL Doc Tracking	NBL Document Tracking Application	
NBL Instrument Calib	NBL Instrument Calibration System	
NBL Purchase Req	NBL Purchase Requisition System	

NBL Stockroom Inventory	NBL Stockroom Inventory	
NBL Technical Timesheets	NBL Technical Timesheets	
NDA	NDA	
NEPA	National Environment Policy Act System	The National Environment Policy Act requires an environmental impact review to determine any impact a proposed action may have on the environment. The NEPA system is used to track information contained in these environmental impact reviews to insure proper oversight of project and their potential impact on the environment.
OPAC	OPAC On-Line Payment & Collection System	Online Payment and Collection System (OPAC), a component of the Government On-Line Accounting Link System (GOALS), establishes a standardized interagency billing and collection procedure via a telecommunications network.
PalmPilot	PalmPilot	Handheld organizer with address book, calendar.
PATMIS	Patent Management Information System	The Patent Management Information System is a tracking system for patents, waivers, inventors, inventions, & contracts for DOE-CH.
Phosphorimeter	Phosphorimeter	
Plutonium Coulemetry	Plutonium Coulemetry	
Precious Metals Inventory	Precious Metals Inventory	

QAP	Quality Assurance Program	Twice yearly, test samples are shipped to laboratories around the world. The labs analyze them and report the values to EML. EML then calculates the percent deviation from the known activity and reports whether the lab's analysis is within acceptable limits.
RAMP	Remote Atmospheric Monitoring Program	Sample spectra are transmitted by ARGOS satellites from remote locations. The EML VAX automatically retrieves data from SystemARGOS. The spectra are analyzed for radioactivity. If high levels are found, appropriate staff are notified by VAX mail and telephone. A control program, RAMPMAN, allows monitoring and control of the automatic process.
Rec Man Trac Sys	Records Management Tracking System	The main function of the Records Management Tracking System is tracking inactive records located at the federal records center and CH offsite storage facilities.
Report Writer	Report Writer	Finishing touches on database for QAP report.
Rewards and Recognition	Rewards and Recognition	Rewards and Recognition is an automated Intranet awards system used by all CH. It is a subsystem of Allnames and integrates with MS-Exchange in the same manner as the Training Reservation System (TRS).
RUNPAPERS	Publications	Database of EML publications. Allows searching and listing.
RUNPRES	Presentations	Database of presentations given by EML staff. Allows searching and listing.

RUNREQ, RUNPO	Requisitioning	Generates, routes, and prints requisitions and purchase orders. Staff enters requisition information, the req is routed through approvals, the order is placed by the purchasing agent who prints a purchase order. When the order arrives, the receiving clerk searches the file for the name of the person who ordered it. Allows searching of past requisitions, reports of spending totals.
Sample Archives	Sample Archives	Database of archived environmental samples collected by EML over its history.
SAS	SAS (Statistical Package)	
SASP	Surface Air Sampling Program	Air filter samples are collected at stations around the world and sent to EML. Data on the samples and on the analysis of the samples for radionuclides are entered in a data file. Activity concentrations are calculated and reported.
SigmaPlot	SigmaPlot	Graphing and analysis software
SigmaStat	SigmaStat	Statistics program for QAP
SPOS	Small Purchase Order System	The Small Purchase Order System is a data entry program that tracks purchase orders and generates reports. A text file of all completed purchase orders is created and uploaded to DISCAS.
SRIM 2000	SRIM 2000	Monte Carlo simulation of energy deposition by particle tracks in matter

Surfer	Surfer	Displays output of deconvoluted in situ data
TableCurve 2D	TableCurve 2D	Curve-fitting and analysis software
Tattle Tools	Tattle Tools	Tattle Tools from Onset Computer Corp. to develop programs for computer cards used in environmental measurement applications.
Technology Transfer	Technology Transfer System	The Technology Transfer system's main function is to track information related to Joint Work Statements (JWS) and Cooperative Research and Development Agreements (CRADA) issued between ANL and various participants.
TIMS	TIMS	
Travel Manager	Travel Manager	Travel Manager is an integrated automated travel processing system chosen by DOE to improve, reengineer and automate the travel approval and vouchering process. The software is designed to prepare, edit, and manage travel documents including travel authorizations, travel vouchers and local travel vouchers. It supports the capability to facilitate electronic signatures, automatic document routing, tracking, auditing and importing/exporting of data. Travel Manager interfaces travel authorization and voucher information with the Departmental Integrated Standardized Core Accounting Systems.
TRS	Training Reservation System	The Training Reservation System is an Intranet application that tracks DOE employees' course registrations and training histories. TRS connects to MS-Exchange to allow supervisory approval and administrator functions.

Uranium Coulometry	Uranium Coulometry	
Vacancy Announcement Syst	Vacancy Announcement System	Facilitates the tracking of incoming resumes for specific related job titles and particular announcements.
VAX	VAX/VMS Cluster	Two VAX's running VMS in a VAX cluster. Provides Requisitioning, Publications, RAMP, SASP.
X-ray	X-ray
